

As local business owners and district homeowners, we support the CFSD overrides because there is a direct connection between superior public schools, quality employees and neighborhood property values. These overrides give us the opportunity to strengthen and refocus our investment in our most vital community assets—our property values, our workforce and our local economy.

As Tucson employers, we value education and a skilled work force, and we recognize that our city is in need of improvement in this area. It is essential that our community be able to attract and retain businesses and top-quality professional services.

We feel strongly that an exceptional education is the key to success for our children. Our district needs the overrides to provide this high quality education. We encourage you to make a continued positive investment in our kids, our neighborhoods and our economic future.
