

August 4, 2015

Our public school system needs your help now more than ever. Our K-12 education needs a strong Science, Technology, Engineering, and Math (STEM) curriculum in order to ensure a bright future for upcoming generations. This investment in the students of today will engender prosperous and vibrant local and national economies. Moreover, such sound K-12 education will inculcate good communal values in the younger generation, who, in turn, will make wise choices for their children and generations to come. A well-rounded education in STEM and the humanities requires strong investments considering ever-changing technologies, highly competitive national and international environments, and rising costs of living. If WE do not invest in the future of our children, who will? We must invest in the future of Tucson and Southern Arizona. Please join us in securing a strong future for our children and for our community. Please vote YES for the proposed bond on the November ballot. Please vote YES on the budget override. Please vote YES for the students of the Catalina Foothills School District.
