

STATEMENT FROM THE GOVERNING BOARD

The Catalina Foothills School District asks you to renew the District Additional Assistance (capital) override on November 8, 2022. Please vote “yes” to continue these funds that are vital to delivering our robust, 21st century curriculum.

A “yes” vote will NOT increase your tax rate.

After extensive study, we have designed a plan to provide for the technology and curriculum resources needed to administer our educational programs. Technology touches every part of our students’ academic endeavors. A continued investment in it is key to their ability to thrive in their lives beyond their CFSD experience and to shape them into contributing citizens in our global community.

The capital funding we receive from the state cannot meet the needs of a 21st century curriculum.

The full year allotment cannot even stretch to cover the cost of reroofing an individual school, let alone extend to providing and maintaining the technological resources we need to deliver our curriculum.

These override monies will equip every classroom with the technological tools and curriculum materials needed by all teachers and all students across all schools. And your tax rate will not increase.

Please vote “Yes” to renew this District Additional Assistance override.

Respectfully submitted,
Governing Board, Catalina Foothills Unified School District #16
